No. SEEPZ-SEZ/ESTATE/CFC/55/2021-22/Vol.I

Date: 19.04.2022

**CIRCULAR No. 16 /2022**

Construction of Mega CFC building will start very shortly adjoining the SDF-I building. During construction, there will be movement of heavy machinery such as JCB, Poclain, Hydra and loaded trucks etc. Construction phase will initially involve demolishing of existing structure, excavation, piling and foundation etc.

It may, however, be brought to the notice of all the concerned that there are optical fibre cables laid by multiple service providers to the various units in the vicinity of the site and may get punctured/damaged during excavation and movement of heavy vehicles/machinery, as a result of which, the communication system of units operating their business in various buildings may get disrupted/paralyzed. Therefore, it is earnestly suggested to all the trade members to identify their communication cables, if laid /passing through the vicinity of construction site and may take measures to re-route or find some other alternative to suit to them. But under any circumstances, SEEPZ-SEZ will not be responsible for any kind of damage to their cables, whatsoever, if took place, during the construction phase of CFC; and the onus lies on the unit owners only.

Power cable around and closer to the site have already been identified and de-energized by the service provider - M/s Adani Electricity

Smt. Briget Joe  
Executive Asstt. To DC,  
SEEPZ-SEZ

To,

- (i) All Units, SEEPZ-SEZ
- (ii) All Utility cable service providers
- (iii) Caretakers, SEEPZ-SEZ
- (iv) Notice Board.
